

EOP #2: 6-foot Circle Game – *for practicing 6 foot putts.*

- + PGA TOUR Pros make 64% of their 6-foot putts, while 20+ handicap amateurs make 45% in tournament play.
- + A 6-foot putt is a very common leave from chips and long (lag) putts.
- + “Almost every golfer I know could improve simply by remembering this one rule: All putts are speed putts.” Dave Pelz’s Putting Bible.
- + This EOP requires a 15ft diameter circle of constant slope – either 2% or 4% grade. If you create a 6-ft Putt Circle EOP, then you also have the 3-ft Putting Circle detailed above.

Game Set-up: Repeat the EOP #1 set-up as above, except at a 6-foot distance from the hole. Start by determining the fall-line of the slope around the hole, mark the straight up and downhill directions from the cup first, and then use a tape measure and Pelz Golf Institute stickers to create the rest of the 10 positions around the hole (see photo). Just like the 3-foot circle drill above, mark the fall-line putts with two stickers (at the 6-foot radius). Place balls at 5 positions around the hole, starting with the fall-line position below the hole, and moving around it in a counter-clockwise direction.

Now Putt: Start at the fall line ball below the hole, and putt each of the 5 putts until you make it (this means retrieve each ball that misses and putt it again until you make it). As you move around the hole, holing each putt in succession, you will learn how much break you must play for each putt. Don’t get hung up on making any specific number of putts in a row. This drill involves completing the circle by making all 10 putts. If you have time, go around the circle again, and hole each putt again. Always move around the 6-foot circle in a counter-clockwise direction for right-handed putters (left-handers move in clockwise direction). This drill will help you with those testy 6-foot knee knockers. Practice these at home and you will be more prepared for these on the course.
